---

### SECTION 6: ACCIDENTAL RELEASE MEASURES

---

**PERSONAL PRECAUTIONS:** For personal protection see section 8. Persons not wearing appropriate protective gear should be excluded from area of spill until clean-up has been completed.

**ENVIRONMENTAL PRECAUTIONS:** Prevent spreading concentrate solution over a wide area (e.g. by containment or oil barriers). Do not let product enter drains. Do not flush into surface water or sanitary sewer system. Spilled material must be collected and properly disposed of. Never return spill material to its original container. Clean contaminated surfaces with plenty of water. Wash clothing and equipment after handling.

**METHODS FOR CLEAN-UP:** Keep in suitable, closed containers for disposal. Plug the leak(s), cut off supply of spill. Dam up and soak up with inert absorbent material. (e.g. sand, silica gel, acid binder, universal binder, sawdust, clay-bases granular).

**SECTION 6 NOTES:** Prevent dust cloud formation. Avoid open flames. Comply with all applicable federal, state, and local regulations for clean-up and disposal methods.

---

### SECTION 7: HANDLING AND STORAGE

---

**HANDLING:** Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Use only in a well-ventilated area. Minimize dust generation and accumulation. Avoid contact with eyes, skin and clothing. Keep container tightly closed. Avoid ingestion and inhalation.

**STORAGE:** Store in a cool, dry, ventilated area. Keep from freezing or away from open flames/heat. Keep out of direct sunlight. Keep only in original (labeled) container. Meet all state and local legal requirements.

**OTHER PRECAUTIONS:** Containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid and/or solid), all hazard precautions given in the data sheet must be observed.

**SECTION 7 NOTES:** Suitable packing materials include stainless steel, aluminum, polyethylene, polypropylene. (NON-SUITABLE: Steel)

---

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

---

**GENERAL ADVICE:** These recommendations provide general guidance for handling this product. Personal protective equipment should be selected for individual applications and should consider factors which affect exposure potential, such as handling practices, chemical concentrations and ventilation. It is ultimately the responsibility of the employer to follow regulatory guidelines established by local authorities.

**VENTILATION:** Always use this material in a well ventilated area.

**RESPIRATORY PROTECTION:** A NIOSH-approved air-purifying respirator with an appropriate cartridge (Type P2) and/or filter may be permissible under certain circumstances where airborne concentrations where airborne concentrations are expected to exceed exposure limits (if applicable) or if overexposure has otherwise been determined. Protection provided by air-purifying respirators is limited. Use a positive pressure, air-supplied respirator if there is any potential for uncontrolled release, exposure levels are not known or any other circumstances where an air-purifying respirator may not provide adequate protection.

Maintain safety shower at all locations where skin contact is imminent. Contact your local safety equipment supplier to assist the facility in determining proper selection of personal protective equipment for the applications/operations present at your facility. Wear resistant gloves (consult your safety equipment supplier). Discard gloves that show tears, pinholes, or signs of wear.

**OTHER PROTECTIVE CLOTHING OR EQUIPMENT:** Aprons are to be worn if material is likely to splash, spill or produce a mist, vapor or spray.

**WORK HYGIENIC PRACTICES:** Wash hands often and whenever you have completed handling this material before you handle other items including your eyes, mouth, etc.

**EXPOSURE GUIDELINES:** Mechanical ventilation systems used to ventilate corrosive storage or process areas in areas, such as manufacturing, should be designed with components that are corrosion resistant.
